Fax: 401-231-4390 | Email: lrutherford@oceanstatesignal.com

PLEASE BRING A GIFT OR BOTTLE FOR THE DOOR PRIZE (put business card on gift/bottle)

PROFESSIONAL DEVELOPMENT WORKSHOP:
ADAPTIVE SIGNAL CONTROL

BACKGROUND

Adaptive traffic signal control is appearing across the United States and New England. It involves programmed timings which adjust based on demand of the roadway, as opposed to traditional traffic signal control which programs for multiple daily timing plans alone. Adaptive systems allow for the controller to think for itself based of feedback from the roadway to adjust maximum green time to help an intersection or corridor operate more efficiently.

WORKSHOP CONTENT

The instructors for this one-day course will provide an overview of America’s best practices for implementing adaptive traffic signal control, including:

- Appropriate setting for Adaptive Signal Control
- Design process and major system components
- Overview of FHWA modeling and Standards
- Discussion of commercial and custom Adaptive Signal Control solutions
- Life Cycle cost associated with Adaptive Signal Control from design to maintenance.

INSTRUCTOR

Mike Wasielewski, P.E., PTOE is a Project Manager with Beta Group, Inc. in their Norwood, MA office, drawing on experience in the design of adaptive traffic signal control projects.

Charles Bluto is a Technical Sales Representative with Ocean State Signals in their Smithfield, RI office, drawing on experience on adaptive traffic signal control component, software, and hardware.

Both presenters have had experience with designing and installing Adaptive Signal Control systems throughout New England.

CONTINUING EDUCATION

Six (6) Professional Development Hours (PDHs) will be awarded to the workshop participants.

FEE

\$220* for private consultants

\$110* for public employees or retired persons

*Includes dinner at the NEITE Annual Meeting along w/ handouts, breaks, and lunch.
