

Transportation Engineer

The Western Connecticut Council of Governments (WestCOG) seeks a Professional Engineer (licensed in Connecticut) to serve as a Project Manager on transportation engineering projects. The employee will be stationed in WestCOG's office in Sandy Hook.

Job responsibilities may evolve over time but initially are expected to include:

- Manage a regional transportation program, including funding allocations
- Develop/solicit, evaluate, program transportation and other projects
- Shepherd projects to commitment/bid/construction
- Review and comment on applications, plans, specifications, quantity/cost estimates, and other bid/contract documents
- Prepare funding applications
- Provide assistance to a multimodal regional transportation program
- Conduct and implement strategic plans
- Manage and inform regional and local plans, studies, and projects
- Analyze data and provide technical assistance
- Create textual and visual documents and presentations
- Coordinate with project partners at local, regional, state, and federal levels
- Partner and interact with government agencies, nonprofits, volunteers, and the public
- Convene and manage group and project meetings
- Train/mentor junior staff
- Other tasks as assigned.

The ideal candidate will have knowledge of and experience with:

- Transportation planning and engineering
- Federal, state, regional, and local government, including in Connecticut
- Metropolitan Planning Organizations (MPOs)
- Federal transportation programs
- State transportation programs, including the Local Transportation Improvement Program (LOTICIP)
- Multimodal transportation
- Design, including context-sensitive design, sustainable design, and design for all users
- Best management practices
- Modeling, simulation, GIS, and CAD
- Project/program development, coordination, management, and delivery
- Financial management, cost containment, and low-cost/innovative approaches
- Congestion management and mitigation
- Intelligent transportation systems
- Environmental sustainability

S/he should have a Bachelor's degree in (Master's preferred) from an accredited university in one of the following or a relevant field:

- Civil Engineering
- Transportation Engineering

in addition to current licensure as a Professional Engineer in Connecticut.

The ideal candidate will have a high level of proficiency in:

- Spoken and written English
- CAD
- GIS
- Spreadsheets and databases

The ideal candidate will be self-motivated, work well with others, and be reliable and conscientious in work ethic and product.

To be considered, applicants must have a driver's license, access to reliable transportation, and be legally able to work in the United States.

Position is expected be filled at the Project Manager level, with the possibility for promotion to a Senior or Principal Project Manager. A full benefits package is provided.

To apply

Before applying, please verify that the position is still open by visiting <http://westcog.org/employment-opportunities/>.

To apply, submit a cover letter including salary requirements, resume, references, and a copy of one's engineering credentials to Mr. Francis R. Pickering, Executive Director at westcog@outlook.com. Selected candidates may be asked to provide additional information or to appear for a personal interview.

WestCOG is an Equal Opportunity Employer.
