Sr. Supervising Traffic Engineer (ID# 41378)

Merrimack, NH

Category: Civil Engineering

Job Type: Full Time

Minimum Experience: 15+

Required Education: Bachelor's Degree

Job Description

Be involved in projects with our Traffic Engineering Team and be a part of a growing organization that meets our client's objectives and solves their challenges.

At WSP, we are driven by inspiring the right people to be part of our future-focused business objectives. Our devotion to teamwork has allowed us to build communities and expand our skylines. Here at WSP, anything is within our reach- and yours as a WSP employee. Come join us and help shape the future!

WSP is currently initiating a search for a Senior Supervising Traffic Engineer for our Merrimack, New Hampshire office.

Duties and Responsibilities:

- Work directly with clients and take an active role for expanding our services in New Hampshire and Vermont.
- Responsible for a diverse range of operational and business development activities.

- Provide technical analysis for a wide range of transportation infrastructure and land development projects.
- Perform technical review of Synchro, VISSIM, and other traffic engineering analysis software.
- Interface with staff from a range of other disciplines (civil, structural, planning, geotechnical, etc.) to support a diverse range of projects.
- Perform a range of marketing and business development activities, including outreach and coordination with existing and potential clients, identifying and leading pursuits, developing technical proposals, and interfacing through professional organizations.
- Work cooperatively with clients and existing staff to expand the traffic engineering team.

Job Requirements

Required Skills:

- Knowledge of traffic engineering tools, including Highway Capacity Manual/Highway Capacity Software, Synchro/SimTraffic, VISSIM/VISUM, and other equivalent modeling and analysis tools.
- Knowledge of traffic control device design, including developing design plans, specifications and estimates for final construction documents.
- Working knowledge of appropriate Federal Highway Administration, AASHTO, state DOT, and other relevant guidelines, including the Manual on Uniform Traffic Control Devices, the AASHTO Green Book, and the NACTO Urban Street Design Guide.
- Ability to establish partnerships with internal and external project management, client representatives, government agencies, and other organizations.
- Positive attitude and people skills that constitute a team player.
- Ability to manage staff to effectively deliver projects on deadlines, including managing multiple staff working on multiple projects.
- Ability to train and mentor younger staff in the profession of traffic engineering.
- Ability to market the skills of the traffic and transportation engineering practice.
- Ability to work in a corporate environment, communicating with a wide range of professional skill sets.

Talent is the essence of meeting our client's objectives, goals and challenges. If this sounds like a fit for you, we'd love to have that first discussion of you joining our team.

Qualifications:

- B.S. degree in Civil/Traffic Engineering (M.S. degree desirable) .
- 15+ years of experience in managing traffic engineering design and construction projects.
- Demonstrated track record of working with clients throughout the state.

- New Hampshire PE license, and/or ability to obtain PE licenses in NH and VT within six months.
- Demonstrated business development skills.
- Experience with MicroStation, and/or AutoCAD Civil 3D is desirable.
- Excellent verbal and written communication skills.
- A strong background in transportation planning, traffic engineering and client/project management.
