

Job Title: Transportation Permitting Project Manager

WHY CHOOSE HSH:

We are an expanding, dynamic firm of transportation experts based in Massachusetts and working throughout the Northeast. With civil and transportation engineers, as well as planning experts, we work on some of the most high-profile, exciting, and complex projects. Our culture is warm, close-knit, and fully engaged with colleagues and clients.

We have offices in Boston, Chelmsford, and Worcester. We are well-known in the region and enjoy close working relationships with our clients and partners. Our aim is to offer rewarding professional experiences with opportunities for professional development and leadership. Our culture is what sets us apart. Come check it out for yourself!

RESPONSIBILITIES:

To address our continued growth, we have a unique opportunity for a Transportation Permitting Project Manager to join our Land Development team. Required experience includes traffic/transportation impact studies, traffic data collection, traffic operations analysis and calibration, parking studies, bicycle and pedestrian facility evaluations, cutting edge transportation demand management measures, transportation conceptual planning and site design assistance, and report production. Must possess an understanding of the MEPA development permitting processes. Knowledge of City of Boston, City of Cambridge, and City of Somerville local permitting processes a plus.

The responsibilities of a qualified candidate include directing and mentoring junior staff, overseeing technical analysis tasks, maintaining client communication, collaborating with project team members, preparing deliverables, ensuring quality control, adhering to project schedules and budgets, coordinating with public agency staff, and presenting to stakeholder/community groups. Other key duties include writing proposals and developing budget estimates for new projects, and participating in professional organizations and fostering business development opportunities.

DESIRED SKILLS AND EXPERIENCE:

- Bachelor's Degree in Civil Engineering
- 5-10 years' experience required
- Experience with Synchro traffic analysis software (Vissim a plus)
- Experience with AutoCAD strongly preferred
- Strong written and verbal communication skills
- Proficient in Microsoft Office Suite (Word, Excel, Teams, PowerPoint)
- Ability to work in team environment as an individual contributor, and enjoy learning
- Ability to utilize critical thinking, judgment and experience to define, analyze and resolve problems and issues
